cecilia@ibik.ac.id

SituGEde is a valuable environmental asset for soil and water ecosystems in the city of Bogor and its surroundings. The productive use of this area can be done through ecotourism. The concept of back to nature is a contemporary lifestyle that is increasingly popular, especially after the COVID-19 pandemic. In order for the function of ecotourism to be carried out in a sustainable manner, collaboration between concepts and stakeholders is a priority.

Keywords: ecotourism, local wisdom
